Marseille 100MW energy storage project

Overview

What is France's largest battery energy storage system (BESS)?

Leading battery storage developer Harmony Energy is set to deliver France's largest battery energy storage system (BESS)—the Cheviré battery project – using Tesla Megapack technology. The project will mark a significant milestone for the French energy system, being France's first large-scale 2-hour battery.

Will Harmony Energy build a battery energy storage system in France?

A render of the project Harmony will build in France. Image: Harmony Energy. Developer Harmony Energy is set to build a 100MW/200MWh battery energy storage system (BESS) project in France, the country's largest.

Which country is building the largest battery energy storage system?

Image: Harmony Energy. Developer Harmony Energy is set to build a 100MW/200MWh battery energy storage system (BESS) project in France, the country's largest. The company will deploy Tesla Megapacks for the 2-hour 'Cheviré' project in Nantes Saint-Nazaire Harbour, western France, the first large-scale 2-hour system in the country, Harmony said.

Could Tesla Megapack power France's largest battery energy storage system?

From ESS News UK-based renewables developer Harmony Energy is looking to deliver France's largest battery energy storage system (BESS)—the Cheviré project – using Tesla Megapack technology. The 100 MW project will mark a significant milestone for the French energy system, being the nation's first large-scale two-hour battery, the developer said.
