

**BLINK SOLAR**

# **Maseru Hydrogen Energy Supply Station**

## Overview

---

Is hydrogen a good energy storage option?

Hydrogen is the only way to realize monthly, cross-seasonal energy storage among pumped-storage, compressed air energy storage, battery energy storage, capacitor energy storage, and flywheel energy storage.

Can external hydrogen supply solutions be used in a hydrogen fueling station?

If limiting the end-use cost within 40 CNY/kg including the cost of hydrogen dispenser, according to operating experience in China, all external hydrogen supply solutions cannot be applied in the hydrogen fueling station with a scale of 1000 kgH<sub>2</sub>/d, even for solution 3a with internal hydrogen sources.

Why is hydrogen available in Shanghai hydrogen fueling stations?

In addition, hydrogen produced from Shanghai offshore wind power is able to consume fluctuating output, makes carbon free hydrogen available in Shanghai hydrogen fueling stations. On-site hydrogen production from natural gas is one of the global trends in the development of hydrogen fueling stations.

What is the best hydrogen supply solution in China?

Technical and economically analysis for each hydrogen supply solution. Industrial off-gas and natural gas are suitable for short-term hydrogen sources. Offshore wind power has the greatest potential as future hydrogen source. Shanghai is one of the fastest growing regions of hydrogen energy in China.

## Maseru Hydrogen Energy Supply Station

---

### **Maseru Energy Storage Industrial Park Factory Operation**

Resilient operation of multi-energy industrial park based on ... Please cite this article as: Liu J et al., Resilient operation of multi-energy industrial park based on integrated hydrogen-electricity ...
