Monaco Solar Tiles

Overview

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

How do solar tiles work?

Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof. Photovoltaic cells in solar tiles turn sunlight into direct current (DC) energy.

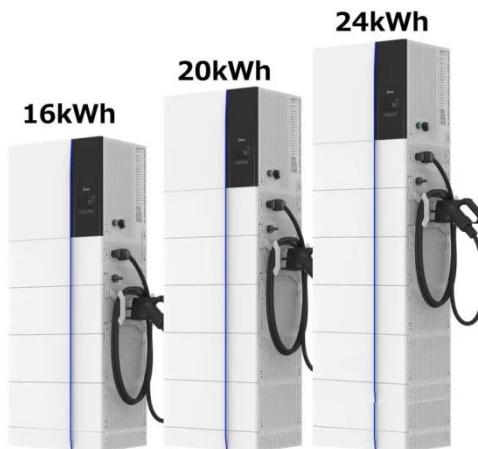

Do solar roof tiles have a warranty?

Glass and steel roofing tiles make up solar roof tiles. While the latter is flexible and can be installed on rooftops of any size or shape, the former is strong and offers exposure to the sun, which produces energy. In addition, while solar panels have a 20-year warranty, solar roof tiles have a 25-year warranty.

Who makes sunstyle® roof tiles?

SunStyle International, a subsidiary of the Akuo Group, is a French co-designer and manufacturer of solar photovoltaic roof tiles. In addition to their roofing function, the SunStyle® tiles combine power generation with a contemporary style to create buildings that meet environmental challenges.
