# **New Zealand Telecommunications Base Station EMS Service Provider**

## Overview

---

Will New Zealand's emergency services share a radio network?

"For the first time in New Zealand's history, the four emergency services agencies will share the same radio network. This will enable greater interoperability between the organisations, bring improved efficiencies and safety for frontline staff – and ultimately, benefit the communities they serve," she said.

What is New Zealand telecommunications infrastructure?

The New Zealand telecommunications infrastructure covers the networks that carry our voice and data between users across the country and our connections with the rest of the world, impacting our livability and productivity.

Is there a commercial Emergency Response Team in New Zealand?

There is simply no other commercial emergency response team in New Zealand with our level of front-line experience. We have a combined 70-odd years in responding to emergencies of all kinds, from fires and chemical spills to serious medical emergencies and significant security breaches. Read more about our background [here](#).

Who is signals NZ?

Signals NZ is New Zealand Exclusive Sepura and Damm TetraFlex distributor. With the power of the mobile network, you can just Push-To-Talk to anyone on your team, no matter where they are. Finally, there are no borders or restrictions to contend with, just easy communication.
