

## BLINK SOLAR

**No need to charge on-site  
energy outdoor solar energy**

## Overview

---

Can solar batteries be installed outside?

The short answer is yes, solar batteries can be installed outdoors—but there are some important considerations to ensure safety, efficiency, and longevity. In this guide, we'll walk you through the benefits, risks, and best practices for installing your solar battery outdoors.

Should I buy an off-grid solar power system?

If you answered “yes” to two or more, an off-grid solar power system could be a perfect fit. Here's a step-by-step approach to selecting the right system: Calculate all appliances' power usage. For example, a home using 15 kWh per day may require a 5kW system and at least a 15kWh battery bank. Consider your location's peak sun hours.

Are solar batteries safe for outdoor installations?

Outdoor installations make solar batteries more susceptible to theft and damage from the environment. To minimize the risk, it's essential to use locks, enclosures, and even security cameras to protect your battery from theft or vandalism. Outdoor solar batteries require regular maintenance.

Does SmartEnergy support off-grid homes?

SmartEnergy supports grid-tied and off-grid homes alike. Discover off-grid energy solutions with solar panels, battery storage, and hybrid setups to gain full energy independence and avoid outages.
