# **Nordic communication tower base station infrastructure**

## Overview

---

What telecommunications companies are in the Nordic region?

The Nordic region is one of the world's most digitized and advanced in telecommunications. It houses large telecom providers such as Nokia and Ericsson, both leading companies in the coverage of 5G and other major telecom infrastructures.

Why should you choose a telecom provider in the Nordics?

As a key player in the Nordics, we stand as one of the largest providers of telecom infrastructure. Through our 20,000 strategically positioned sites, encompassing towers, masts, and buildings, we deliver innovative solutions that empower both wireless and non-wireless networks across the Nordic region.

What are base stations & cell towers?

These structures facilitate the transmission and reception of signals between mobile devices and the wider network, enabling voice calls, text messages, and data services. Understanding the role and technology behind base stations and cell towers is key to appreciating how mobile networks operate and evolve to meet growing demands. Base Stations.

Who is Telenor infrastructure?

At Telenor Infrastructure we are answering the needs of today and solving the needs of tomorrow. Telenor Towers is the largest provider of passive cellular telecom infrastructure in the Nordics, and includes the leading tower companies Telenor Towers Norway, Telenor Towers Sweden, and DNA Tower (Finland).
