# Outdoor Power LCD Screen

Solar Panel

PV Combiner Box

Lithium Battery

Hybrid Inverter

## Overview

---

What is an outdoor LCD panel?

The outdoor LCD panel is a cutting-edge display solution designed to thrive in diverse outdoor environments. Engineered with robustness and performance in mind, it combines high brightness with advanced temperature control to ensure clear visibility and longevity.

What are outdoor LED screens?

Outdoor LED screens are large digital displays that offer a fantastic way to advertise, inform or display any content outdoors. When installed at well-known landmarks, they provide a wonderful image for attracting viewers and passers-by, promoting your client's brand, products and services, and allowing you to earn higher revenues.

How much power does an outdoor LED screen use?

The brightness of outdoor LED display is generally about 5500cd/m<sup>2</sup>-7500cd/m<sup>2</sup>. In general, the same configuration and type of LED screen, the higher the brightness, the greater the power. Then the maximum power consumption per square meter of outdoor screen is about 700-1200W. The power used for normal play information is generally 280W-480W.

Why should you choose an outdoor LCD panel?

The outdoor LCD panel offers a multitude of practical benefits for potential customers. Firstly, its high brightness guarantees content visibility even in sunny conditions, ensuring your message is always seen. Secondly, the durable construction withstands harsh weather conditions, reducing maintenance needs and costs.
