Outdoor UPS uninterruptible power supply wholesale solar container price

Overview

What is an on-line UPS (uninterruptible power supply)?

An on-line UPS (Uninterruptible power supply), consist of a battery, battery charger and inverter. The on-line ups is also termed as double conversion system. In the above types of the primary source of power is AC mains, while in case of on-line ups the primary source of power is inverter present in the UPS.

Why do I need an external uninterruptable power supply (UPS)?

My main PC is a silent desktop which means (unlike a laptop) has no resilience to power outages. This is where an external uninterruptable power supply (UPS) comes in handy. A UPS is like a big battery that gets charged from main power, but when there is an outage the battery kicks in and provides power to connected devices.

What is outdoor UPS & how does it work?

Outdoor UPS is designed for extreme demanding environments where clean backup power is needed. Built-in with AVR function, it helps to maintain normal operation without transferring to battery mode during . charging current The battery backup system provides constant and reliable backup power to outdoor equipment.
