Poland Krakow Flow Battery Industrial Park

Overview

Why is Poland becoming a magnet for battery factories?

Poland is rapidly becoming a magnet for investments in battery factories thanks to its skilled workforce and government programmes promoting electromobility. Which companies are driving this transformation and what is their impact on the industry?

.

Why should you invest in a battery factory in Poland?

Today, Poland emerges as a strategic destination for investment in battery factories, attracting the attention of European companies with a highly qualified workforce that includes engineers, scientists, and electromobility specialists.

Who makes a battery in Poland?

In fact, major industry players such as LG Energy Solutions and Umicore, have established a strong presence there. According to a McKinsey report, the Polish nation ranks second globally in battery production capacity, following China, with 73 GWh in 2022.

Where is the world's largest battery production plant located?

Since 2016, the company has operated the world's largest battery production plant in Poland to prepare for the growing electric vehicle market and to lead the European market. The company has also announced that it will increase its production capacity to 100 GWh by 2025 through further plant expansion.
