# **Poland outdoor solar power system**

## Overview

---

How is the solar energy industry developing in Poland?

The solar energy industry in Poland is developing at every level, from smaller, privately-owned rooftop PV systems and commercial rooftop systems to large free-standing installations.

What are the conditions for solar energy generation in Poland?

Poland has favorable conditions for solar energy generation, with a good amount of sunlight throughout the year. The government has introduced several measures to promote the development of the solar industry, including feed-in tariffs, net metering, and renewable energy auctions.

Are solar panels a good idea in Poland?

Solar energy also has high public support in national polls. A survey commissioned by the Polish Photovoltaic Association in 2022 revealed that more than half of the Poles want solar installations in their neighborhoods, while 2 out of 5 respondents think installing solar panels on all buildings is a good idea.

Will solar power be a good investment in Poland in 2025?

Thanks to additional government subsidies for small private PV systems and high electricity prices of over 30 eurocents per kilowatt hour for companies, investments in own electricity generation in both areas will become attractive in 2025. In September 2024 alone, PV systems with a total power of 363.53 megawatts were installed in Poland.
