

BLINK SOLAR

Polish energy storage power supply company

Overview

Why is Poland a leader in energy storage technology?

Poland's regulatory environment is increasingly supportive of BESS investments, with new policies offering tax incentives and subsidies. The alignment with European Union energy directives further propels the adoption of renewable energy and energy storage solutions, positioning Poland as a leader in energy storage technology within the region.

Does Poland need a battery energy storage system?

As Poland shifts from coal to renewable energy, the demand for robust Battery Energy Storage Systems is increasing. This transition requires effective storage solutions to manage the intermittency of renewable sources like wind and solar.

Why is a massive energy storage facility being built in Poland?

Poland is witnessing substantial investments in BESS, driven by the need to accommodate the increasing share of renewable energy in the national grid. The strategic partnership between LG Energy Solution and Polska Grupa Energetyczna for a massive energy storage facility exemplifies this trend.

Which company is a beneficiary of the energy transformation in Poland?

The company is a beneficiary of the current and the planned energy transformation in Poland by 2050. ONDE holds an over 50% share in the wind farm construction market and a 10% share in construction of photovoltaic farms in Poland.
