# Price of 1 watt solar panel

# Overview

How much does a solar system cost per watt?

As of publishing, the average cost per watt is $2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.

What are solar panel costs?

Solar panel costs refer to the price or expense associated with the acquisition and installation of solar photovoltaic (PV) systems and encompass a wide range of financial considerations. By definition, a solar panel, which converts sunlight into electricity using photovoltaic (PV) cells, is a component of these systems, but it's not the only one.

How much does a 5 kilowatt solar system cost?

The price of a typical 5-kilowatt solar system, which includes additional components like an inverter, is usually priced between $8,000 and $18,000. The exact cost varies depending on the number of solar panels, the brand, the installer, and available incentives.

How much does a 6 kW solar panel installation cost?

The average 6-kW residential solar panel installation is $17,852 before incentives. Learn about cost factors, financing options, tax breaks and more.
