# **Price of household energy storage power supply in Laos**

## Overview

---

What is the price of electricity in Laos?

Laos, September 2022: The price of electricity is 0.034 U.S. Dollar per kWh for households and 0.000 U.S. Dollar for businesses which includes all components of the electricity bill such as the cost of power, distribution and taxes.

Should Laos diversify its power supply?

To maintain power supply stability, she suggested that Laos diversify its sources of power to include more solar and wind energy. The price of both has dropped globally and, based on data collected by the Stimson Centre, the price of these renewables is also getting cheaper in the Mekong region.

Does Laos re-import electricity?

Although a small percentage compared to total consumption in Laos, the amount of re-imported energy tells a bigger story: According to data from EDL, the state-run firm sells electricity to neighboring countries such as the Electricity Generating Authority of Thailand (EGAT) at a slightly lower price than what it pays to re-import from it.

Why are electricity prices higher in Thailand than in Laos?

"The production cost of electricity in Thailand is probably higher than in Laos because of the contribution of oil and gas generation," said a senior official at the Energy Policy and Planning Department, Ministry of Energy and Mines, adding that EDL has been negotiating with EGAT to make sure that the export and import price is about the same.
