Overview

Where can I find the latest solar panels production & testing machines?

Discover the latest Solar panels' production & testing machines from Ecoprogetti Srl by clicking [here](#). Solar panel production equipment and machinery Nowadays the solar panels' production equipment is divided into the following required machinery and accessories.

What are the different types of solar production machines?

Solar (PV) production machines come in a wide range of sizes. You can start with a very small line (for example, 25 MW) using refurbished equipment, or you can opt for brand new machines. Brand new machines range from 50 MW (the smallest size) to fully automated lines with 1 GW capacity or more.

How are solar panels manufactured?

Nowadays the solar panels' production equipment is divided into the following required machinery and accessories. The first run automated processes are the stringing and lamination, but also the analysis of quality as electroluminescence tests. These and other procedures are indispensable for the correct manufacture of the module in each component.

Should you buy a new solar production machine?

Refurbished solar machinery can be an excellent opportunity to start, especially in areas with low salaries and markets demanding smaller-sized panels. If you want to start with the latest technology and high automation, then you need to opt for new solar production machines.
