Proportion of new energy storage in Cebu Philippines

Overview

What are the benefits of energy storage systems in the Philippines?

Configuring an energy storage system can alleviate grid congestion and improve grid stability. Smoother Energy Output: As of now, the Philippine power grid coverage rate is about 91%, and some areas still have problems with no power coverage, insufficient power supply, and unstable power.

Is Aboitiz Power Building a hybrid battery energy storage system in Cebu?

MANILA, Philippines — Aboitiz Power Corp. is building a 30-megawatt hybrid battery energy storage system (BESS) project within the Mactan Economic Zone in Cebu. Slated for commissioning in the first half of 2026, the project is poised to become one of the first large-scale energy storage systems in Central Visayas.

Why does Cebu need a strong power supply?

Cebu, which accounts for half of Visayas' energy use, faces growing power demands. The expansion is crucial for meeting these needs, ensuring stable electricity supply for the region's expanding economy. Cebu's expanding economy mirrors the nation's growing energy needs, with both requiring reliable power supply to sustain growth.

Will Bess be the first large-scale energy storage system in Central Visayas?

Slated for commissioning in the first half of 2026, the project is poised to become one of the first large-scale energy storage systems in Central Visayas. MANILA, Philippines — Aboitiz Power Corp. is building a 30-megawatt hybrid battery energy storage system (BESS) project within the Mactan Economic Zone in Cebu.
