Riga large UPS uninterruptible power supply recommendation

Overview

What is an uninterruptible power supply (UPS)?

A solid Uninterruptible Power Supply (UPS) can be a real lifesaver, keeping everything running smoothly when the lights go out. We've done some digging into the top picks, backed by data and expert review.

What is a line-interactive UPS?

Line-interactive UPSs actively regulate voltage either by boosting or decreasing utility power as necessary before allowing it to pass to the protected equipment or by resorting to battery power. Line-interactive models are ideal for applications where protection from power anomalies is required, but the utility power is relatively clean.

Why do I need an ups if I have a power outage?

protected by attaching a UPS, ensuring they are able to function in the event of a power outage and, if needed, shut down cleanly if power remains out for an extended period of time. Surge devices are required as well, to protect both critical equipment, and even the UPS itself. Learn more about Eaton.

Is a ups a primary surge protection device?

A UPS delivers second-level protection against surges; it should never be considered a primary surge protection device. It also continually regulates incoming voltage and provides an internal battery that allows connected equipment to continue running even if the power supply is cut.
