

## BLINK SOLAR

# Riyadh 400mw energy storage power station

## Overview

---

Saudi Arabia is constructing the world's largest solar-storage microgrid, a 400-MW solar project backed by 1.3 GWh of energy storage, to power the Red Sea Project on the Kingdom's west coast. Is Huawei building a microgrid power station in Saudi Arabia?

An advertisement in the NEOM region in Tabuk, Saudi Arabia. Credit: SaudiArabiaPhotography. Huawei has built the world's largest microgrid power station, which has the capacity to generate one billion kilowatt-hours (kWh) of power a year and provide power to Saudi Arabia's Red Sea New City project.

Can a microgrid power station power the Red Sea project?

According to Yougi, the microgrid power station can provide 400MW of photovoltaic power and 1.3 gigawatt-hours of energy storage. Huawei has been working on the technology for ten years. Huawei said that its microgrid solution has been "providing 1kWh of green power supply to the Red Sea project since September 2023".

Will Huawei power Saudi Arabia's Red Sea project?

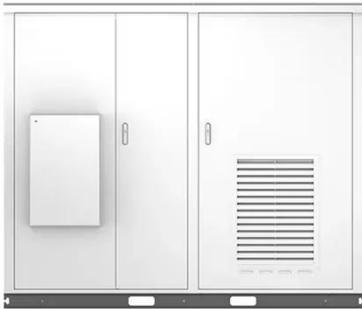

Huawei has developed the world's largest microgrid power station which delivers 1 billion kWh power supply per year. The new solution will play a significant role in Saudi Arabia's Red Sea project and provide several green electricity benefits.

Which is the world's largest microgrid power station?

Huawei has developed the world's largest microgrid power station which delivers 1 billion kWh power supply per year. The new solution will pla

## Riyadh 400mw energy storage power station
