Overview

In the period from Nov 2023 to Oct 2024, 74 suppliers were active, with SC ROMBAT BATTERY DRUMUL CETATII NR 4 BISTRITA, POWER TOOLS DISTRIBUTION N V, and Renault SAS accounting for 66% of Romania's total Battery exports. Will Sinteza build a gridstar flow battery factory in Oradea?

Lockheed Martin and Romania's Sinteza S.A. have signed a letter of intent to build a GridStar Flow battery factory in Oradea. The GridStar Flow technology, developed by Lockheed Martin, is an innovative solution for clean, zero-carbon energy storage with increased resilience to grid disruptions.

How important is the battery industry in Romania?

The battery industry in Romania presents several key considerations for those interested in researching companies in this field. First, understanding the regulatory environment is crucial, as the country aligns with European Union standards for battery production and recycling, emphasizing sustainability and environmental responsibility.

Why is Romania a good place to buy a battery?

Additionally, the competitive landscape includes both local manufacturers and international players, which can influence market dynamics and pricing. Romania's strategic location in Eastern Europe also enhances its global market relevance, making it an attractive hub for battery production and distribution.

What are flow batteries used for?

Flow batteries help create a more stable grid and reduce grid congestion and fill renewable energy production shortfalls for asset owners. Global R&D is fueling the development of flow battery chemistry by significantly enabling higher energy density electrodes and also extending flow battery applications.
