# **Russian outdoor wind power base station customized manufacturer**

## Overview

---

Where are wind turbines made?

Located in Volgodonsk (Rostov Region, Russia) at Rosatom's power engineering centre Atommash, Rosatom Renewable Energy Plant manufactures wind turbine components and assemblies. The plant's building and cranes were retrofitted and upgraded to meet wind turbine production requirements.

How many Russian power plants are equipped with our equipment?

70% of Russian power plants are equipped with our equipment. Power is in our people. Energy in products. In 2018, Power Machines announced the development of its own technology for manufacturing gas turbines with a capacity of 65 MW and 170 MW as a part of the upgrade program for thermal power plants in Russia.

How big is Rostom wind energy?

The total portfolio of ROSATOM Wind Energy Division is about 1.7 GW (including the commissioned wind farms with a total capacity of 1 GW), which confirms the company's position as one of the leaders in the wind energy industry in Russia.

Who made the first half-speed steam turbine in Russia?

Based on its experience creating heavy-duty full-speed steam turbines and achieving advanced scientific achievements, Power Machines developed and manufactured the first half-speed turbine unit in Russia with a capacity of 1255 MW.
