# **San Diego Grid Energy Storage Solution**

## Overview

---

What is grid energy storage?

Grid energy storage, also known as large-scale energy storage, is a set of technologies connected to the electrical power grid that store energy for later use. These systems help balance supply and demand by storing excess electricity from variable renewables such as solar and inflexible sources like nuclear power, releasing it when needed.

How much battery storage does SDG&E have?

SDG&E's utility-owned battery storage portfolio is expected to reach nearly 480 MW of power capacity and over 1.9 GWh of energy storage by year-end, including the Westside Canal expansion and two additional projects in San Diego County currently being constructed.

What does SDG&E do?

SDG&E is an innovative energy delivery company that provides clean, safe and reliable energy to better the lives of the people it serves in San Diego and southern Orange counties.

Will 131 MW energy storage facility be fully operational by June 2025?

This expansion project will add 100 megawatts (MW) of energy storage capacity to the existing 131 MW facility and is projected to be fully operational by June 2025. This expansion project will add 100 megawatts (MW) of energy storage capacity to the existing 131 MW facility.
