# **San Jose's second batch of energy storage project investment**

## Overview

---

esVolta secured \$110M financing with Greenprint Capital to build the 300 MWh Hummingbird energy storage project in San Jose, California. The project is expected to be completed by 2025. When will hummingbird battery energy storage project be completed?

The project is currently under construction and is expected to be completed in 2025. esVolta, an energy storage project developer, completed a \$110 million tax equity transaction with Greenprint Capital Management to develop and construct the 300 MWh Hummingbird battery energy storage project in San Jose, California.

Which energy storage facility will provide resource adequacy support to Pacific Gas & Electric?

Could data centers for AI triple San Jose's energy use?

Data centers for AI could nearly triple San Jose's energy use. Who foots the bill?

| AP News Data centers for AI could nearly triple San Jose's energy use. Who foots the bill?

San Jose, the symbolic capital of Silicon Valley, is now ground zero in California's battle over how to govern the rise of data centers used to power artificial intelligence.

Should San Jose buy more power?

In San Jose, city energy officials say they are reluctant to procure additional

power until they know which projects will actually be built. “We do not want to buy more power than we need,” said panelist Lori Mitchell, director of San Jose Clean Energy, the city’s publicly-owned electricity provider. “That’s job No. 1.”
