What does a 24V battery inverter do?

A 24V battery inverter is a device that converts 24V battery output (DC, or direct current) into 230V mains output required for domestic appliances (AC, or alternating current). It can also function as a backup / emergency power source in case of power cuts.

How does a 24 volt inverter work?

The majority of 24 volt inverters have a built-in power protection system that works with a low voltage alarm and shutdown. The low voltage alarm will go off when the charge falls below 10 volts on your battery source. When the alarm sounds, the inverter will automatically begin to shut down.
