# Small power station generator set in Zurich Switzerland

✓ IP65/IP55 OUTDOOR CABINET

✓ WATERPROOF OUTDOOR CABINET

✓ 42U/27U

✓ OUTDOOR BATTERY CABINET

## Overview

---

What makes a good generator set?

In energy facilities, generator sets require specific features depending on the type of plant: medium voltage, high soundproofing, double-walled fuel tanks, separation by rooms, and more. For this reason, we offer fully customised solutions, adapted to every technical, regulatory, or energy efficiency requirement.

Why do we need a generator set for power plants?

For all these reasons, in today's energy models, systems that guarantee the continuity of electricity supply are more essential than ever. Whether in an emergency or in isolated systems where renewables alone cannot ensure stability, generator sets for power plants are the most effective solution.

What is a medium-voltage power plant generator?

Our medium-voltage power plant generators are the most reliable, safe and efficient support for all types of power plants. We keep everything under control by ensuring electricity supply in the event of a system failure or emergency. With our solutions, energy generation never stops.
