Solar Water Pump Works

Overview

What is a solar water pump system?

These systems utilize renewable solar energy to pump water, making them an efficient, eco-friendly, and cost-effective solution for regions with unreliable electricity or high energy costs. Here's a detailed guide on how these systems work, the types available, and the benefits they provide.

Can solar energy water pumps Transform Your Water Management?

Discover how solar energy water pumps can transform your water management! These innovative systems utilize solar power to provide efficient and sustainable solutions for a variety of applications, including irrigation systems and livestock watering. Designed with efficiency in mind, solar energy water pumps offer significant benefits such as:

How do solar energy water pumps work?

Solar energy water pumps function by converting sunlight into usable energy through key components: A solar tracker can be added to optimize energy capture, enhancing system efficiency.

What are the benefits of using a solar pump system?

One of the benefits of using a solar pump system is that it lets you utilize low-yield water sources. With a solar pumping system, you can potentially cut the cost of installing long pipelines. Since the length of the pipes does not affect the energy needed to pump water, the water can be pushed over long distances at a low cost.

How does a solar pump work? And How to choose a solar pump?

Discover how a solar water pumping system operates using solar energy to draw and distribute water efficiently. Learn how to choose the right solar pump.

 **Efficient Higher Revenue**

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPPT Trackers, 100% DC Input Oversizing
- Max. PV Input Current 15A, Compatible with High Power Modules

 **Intelligent Simple O&M**

- IP68 Protection Degree: support outdoor installation
- Smart 117 Curve Diagnostic Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD, prevent lightning damage
- Battery Reverse Connection Protection

 **Flexible Abundant Configuration**

- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 Units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
