# Solar curtain wall warranty

## Overview

---

What is photovoltaic curtain wall?

Introduction: Photovoltaic Curtain Wall refers to a new type of building exterior wall system that combines solar photovoltaic power generation technology with building curtain walls.

How does a solar curtain wall work?

This system integrates photovoltaic components (such as solar panels) into the building curtain wall so that the curtain wall not only has traditional enclosure, decoration, and insulation functions but also can convert solar energy into electrical energy, providing green and clean energy for the building. Features□ 1.

How long does a photovoltaic curtain wall last?

Some curtain walls last 25 years, while others last 30 years. It's worth noting that not all curtain walls have the same lifespan. As others come in different sizes, electricity, energy generation, and features. How thick is the glass on a photovoltaic curtain wall?

Typically ranges from around 6 to 12 millimeters (mm).

Why should you choose a PV curtain wall system?

You enjoy high-profit margins with our wide range of PV Curtain Wall. Impress your customers with a Curtain Wall System capable of generating power efficiently. You build trust among your customers with a track record of quality products. The temperature control functionality enhances indoor comfort.
