Solar glass room sun room

Overview

What is a solar room?

The solar was a room in many English and French medieval manor houses, great houses and castles, mostly on an upper storey, designed as the family's private living and sleeping quarters. Within castles they are often called the "Lords' and Ladies' Chamber" or the "Great Chamber".

Is sunroom glass tempered?

Choose from clear glass or bronze tint. All our glass is tempered for safety. Tempered sunroom glass keeps you safe during accidental breakage. The glass will shatter into tiny pieces instead of dangerously sharp shards. We are proud to be the only sunroom glass manufacturer who performs this process in-house.

What is a solarium & how does it work?

A solarium is a wonderful way to add extra living space to your home for you, your family, and friends. Often referred to as a greenhouse or glass enclosure, a solarium is a type of sunroom addition built entirely of glass. Solariums trap as much light as possible, allowing for an outdoor feel without having to leave the comfort of your home.

What color is a sun room?

A simple sun room that sticks to the basics – a combination of beige and whites to make a universally attractive room. Walls are painted in beige, with white French windows, while furniture is a combination of fully upholstered pieces with one rattan accent piece, all upholstered in white and beige striped fabric.
