# **Solar installed next to tiles**

## Overview

---

Can solar panels be installed on a tile roof?

Yes, solar panels can be installed on a tile roof. In fact, companies have developed methods to install solar panels on tile roofs. Before installation, there's a pre-installation or preparatory stage to consider.

How do I install solar panels on a lightweight tile roof?

The best way to install solar panels on a lightweight tile roof is through a method called inset solar installation, also known as a “comp-out” installation. This technique removes the section of tile where the solar panels will be installed and replaces it with composite shingles before mounting the solar array.

Can a solid Solar Installer install concrete tiles?

For concrete tile roofs, a solar installer can install solar panels. They will temporarily remove just a few tiles, install base plates onto the roof membrane, and attach special hooks to them.

Can you install a solar tile?

As Chris Hall, director of TBS Specialist Products told The Eco Experts, “wherever you can install a roof tile, you can install a solar tile”. Solar tiles were invented for people who wanted a more subtle solar-powered home – and are prepared to pay more for these products.
