Solar lights in home basements

Overview

Is there light in a basement?

There's no light like natural light, but it can be hard to come by in basements. If you have a walkout or daylight basement, it's much easier to get light from outside. These basements feel more open, and you can have complementary interior lights for evening hours.

What is the Best Lighting for a basement remodel?

In basement remodels the basement lights can make or break the entire atmosphere. But the truth is that there's no universal best lighting for every basement. Instead, the lighting needs to fit the specific basement and its layout, usage, and decor. That means there are almost unlimited options for lighting a basement.

Are basement lights a good idea?

For many people, the word "basement" conjures up images of a place that's dark, damp, and dingy. While there are plenty of unfinished basements that fit that description, finished basements can actually be bright, warm, and inviting. In basement remodels the basement lights can make or break the entire atmosphere.

Can a solar tube light a house for free?

With solar tubes, you can light your home for free without the expense of skylight installation or the need to alter the look of your rooms. On a sunny day, one 10-inch solar tube gives you around the same amount of light as three 100-watt bulbs.
