# Solar module roof

**3354KWH**

**1331.2V 2520AH**

## Overview

---

### What is a solar roof?

Solar Roof is comprised of both glass solar tiles and steel roofing tiles. Glass solar tiles produce energy, while architectural-grade steel tiles add longevity and corrosion resistance to your roof. Both are durable, strong and engineered for all-weather protection.

### What are solar roof tiles?

Unlike traditional solar panels that are mounted on top of a roof, solar roof tiles replace the traditional roofing material itself, offering a seamless design that blends into the structure of your home. This innovative roofing system allows homeowners to enjoy the benefits of solar energy without compromising on aesthetics.

### How does a solar roof work?

Glass solar tiles and architectural-grade steel tiles, vent covers and ridge caps come together to form a roof that is both durable and powerful. Combine your Solar Roof with Powerwall—a home battery featuring an integrated solar inverter for increased efficiency and dependable energy storage 24/7.

### What are integrated solar roof tiles?

Integrated solar roof tiles, often referred to as solar shingles, are roofing materials embedded with photovoltaic (PV) cells that capture and convert sunlight into electricity.
