# **Solar panel dimensions in Ireland**

## Overview

---

How big should a solar panel be in Ireland?

Most solar panels installed in Irish homes fall within a standard range, but it's useful to understand the common measurements and weights before planning your system. Most residential panels measure around 1.6 to 2 metres tall and just over 1 metre wide.

How many solar panels are needed to power a home in Ireland?

The amount of solar panels required to power a home in Ireland varies depending on the size of the home, and the amount of electricity being consumed. Solar PV systems can potentially generate up to 70% of your electricity with a decent amount of panels and a battery system.

How much roof space do solar panels take up in Ireland?

Before getting started on installing a solar PV system in Ireland, you need to know just how much roof space you have available for solar panels before you start making further decisions. A typical array of 10 solar panels on a rooftop would take up around 20m<sup>2</sup>, while 12 panels might take up roughly 25m<sup>2</sup>.

How many solar panels are there in Ireland?

The exact output of 20 solar panels in Ireland depends on their individual wattage and local conditions. If we consider a common panel size of, say, 400Wp, then 20 panels would form an 8kWp system ( $20 \times 400\text{Wp} = 8000\text{Wp} = 8\text{kWp}$ ).
