Solar panels installed in rural areas of Costa Rica

Overview

How many solar systems are installed in Costa Rica?

ICE has installed 2,559 systems in homes, 649 systems installed for community activities, and 132 systems installed in conservation areas. There are three major solar parks in Costa Rica; Juanilama by Coopeguanacaste, Pocosol by Coopelesca, and Valle Escondido that will be built in 2021 by BMR Energy, contracted by ICE but not in use.

Are solar panels a good investment in Costa Rica?

Solar energy has recently gained traction in Costa Rica, especially for residential and small business use. The abundant sunshine, particularly in dry regions like Guanacaste, makes solar panels an effective solution for individual homes and community projects.

Can solar power improve Costa Rica's energy security?

Solar energy, though currently a minor player, offers untapped potential to enhance Costa Rica's energy security. The country's tropical climate ensures consistent sunlight, making solar PV systems ideal for both utility-scale and distributed generation.

Is solar a viable energy source in Costa Rica?

Critically, the literature reveals gaps in solar-specific research for Costa Rica. While hydroelectric and geothermal energy dominate academic focus, solar remains underrepresented, despite its potential to address energy security and grid stability.
