# **Solar power generation from solar panels in Belgium**

## Overview

---

How much solar energy does Belgium generate?

Total solar energy generation in the country reached new highs last year, totaling 8.3 TWh. Solar accounted for 11.9% of Belgium's electricity generation mix in 2024, according to data released by Elia, the country's transmission system operator. The share of solar in the electricity mix was up from 9.5% in 2023.

Is solar power breaking a new record in Belgium?

With a 23% increase in installed capacity, solar is breaking many records. Renewable generation in Belgium hit a new record, accounting for 29.8% of the electricity mix (compared to 28.2% in 2023). Gas-fired generation hit an all-time low, making up 17.6% of the generation mix (compared to 25.2% in 2023 and 26.9% in 2022).

What percentage of Belgium's Electricity is renewable?

The share of solar in the electricity mix was up from 9.5% in 2023. It was the largest source of renewable electricity generation last year, overtaking offshore wind. The association said renewable electricity accounted for 29.8% of Belgium's electricity generation in 2024, up from 28.2% in 2023, setting a new record.

How much solar power does Belgium have in 2024?

Total renewable generation in 2024 reached 20.8 TWh, down from 21.5 TWh in 2023 due to exceptional wind conditions. In July, analysts from the Becquerel Institute predicted that Belgium added 337 MW of new solar capacity in the first half of 2024, with an estimated 900 MW for the year.
