**Solar power generation with
solar panels in New York USA**

Overview

How much do solar panels cost in New York?

The biggest hurdle to solar and battery is the sticker price, especially in New York where homeowners need more panels to get the same production as sunnier states. Even after applying state and federal incentives, a typical solar-only project costs between \$10,000 to \$20,000, and not everybody has that kind of cash lying around.

What is the largest solar project in New York?

At 27 MW, Branscomb Solar in Schaghticoke is among the largest solar installations in New York. Completed by CS Energy in 2021, this solar project has enough electric capacity to power more than 4,934 homes. See how solar is growing in New York with the latest data on capacity, installations, and trends shaping the state's future.

Is solar a good investment in New York State?

The Empire State isn't exactly known for sunshine, but between fast-rising utility rates and some of the country's best state-level solar incentives, going solar in New York State is a great long-term investment. Did you know?

The "One Big Beautiful Bill" signed into law on July 4 ends the 30% tax credit for residential solar at the end of 2025.

Is New York a good state for solar?

Despite receiving less sunlight than much of the country, New York State is one of the leaders in residential solar adoption and ranks sixth for projected growth over the next 5 years. That's largely due to the state having some of the highest electricity prices and arguably the best solar incentives.
