Solar power station for home in France

Overview

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is €540 per household per year.

Can you sell solar panels in France?

In France, it is possible to sell the electricity produced by your solar panels to EDF or another energy supplier. The feed-in price depends on the power of your installation and the conditions of the contract. The average lifespan of solar panels is around 25 years.

How much does a solar installation cost in France?

Shadows can significantly reduce the energy output of your solar panels. The price of a solar installation depends on several factors such as power (expressed in kilowatt-peak, or kwc), the technology chosen and installation costs. On average in France, count between 2500 and 4000 euros excluding tax per kwc for a residential installation.

Does France have solar power?

Only in 2008 did France see a significant increase in solar PV installations. From a low point in 2009 to a high point in 2011, PV capacity nearly tenfold. Solar power in France grew steadily in 2015, reaching a total photovoltaic capacity of 6.6 gigawatts by the end of the year, delivering 6.7 Terawatt hours of electricity.
