Solar roof integrated panel

Overview

What are in-roof solar panels?

In-roof solar panels, also known as integrated solar panels, are solar panels that are installed directly into the roof structure instead of being mounted on top. They replace the roofing material itself and sit flush with the roofline, providing a seamless aesthetic that traditional solar panels do not. Are in-roof solar panels as efficient?

.

What is a fully integrated solar roof?

That's a promise. Our fully integrated solar roof is optimized for the aesthetical design of the whole house. The sleek vertical lines of a classy black roof will give your house an aesthetic look and blend in seamlessly with any neighborhood. Cutting-edge solar cells are integrated directly into high-quality metal sheets.

Are in-roof solar panels a game-changer?

Blending seamlessly with your roofline, in-roof solar panels can be a game-changer for your home. Here's why: • Seamless Design: Unlike traditional panels that sit on top of your roof, in-roof solar panels are integrated into the structure of your roof. This means they look sleek and modern, blending right in with your home's design.

Are in-roof solar panels right for Your House?

They integrate smoothly into your roof during construction or when you're replacing an old roof, avoiding the visual clutter of typical installations. Blending seamlessly with your roofline, in-roof solar panels can be a game-changer for your home. Here's why:
