

**BLINK SOLAR**

# **South Korean solar container communication station flywheel energy storage solar power generation manufacturer**

## Overview

---

What is South Korea's new high-inertia flywheel synchronous condenser?

Together, the companies are introducing South Korea's inaugural high-inertia flywheel synchronous condenser, marking a significant advancement in energy sustainability. The cutting-edge condenser, boasting a 50-megavolt-ampere reactive power (Mvar) capacity, is set for deployment near a pivotal HVDC connection on Jeju Island.

Which company produces solar cells in South Korea?

ower left and lower right, respectively. Cells and Modules Hanwha Solutions (Hanwha Q CELLS) and Hyundai Energy Solutions currently produce solar cells in South Korea with a combined capacity of 5.2 GW/year,<sup>22</sup> about 3.5% of the total global capacity. In 2021.

What will ABB do for South Korea?

"Through this project, ABB will set the standards for flywheel synchronous condenser systems in South Korea. "We look forward to continuing our technological collaboration with KEPCO to further enhance the future stability of the Korean power grid as it transitions to green energy."

Will a flywheel synchronous condenser improve Jeju Island's grid stability?

KEPCO's pressing quest for grid stability on Jeju Island, in the face of escalating renewable energy adoption, culminates with this installation. "The introduction of the ABB's flywheel synchronous condenser system will greatly enhance the stability of the Jeju power grid," says Eun-Bo Sim, President of KEPCO Research Institute.
