Spanish Energy Storage Frequency Modulation Power Station Project

Overview

What is Spain's energy storage program?

For stakeholders in battery storage, thermal storage, and pumped hydro, this program offers not only financial backing but also long-term stability and political support. Spain has launched a €700 million energy storage program to support battery, thermal, and pumped hydro projects, aiming to deploy 2.5–3.5 GW of capacity.

How will Spain increase its energy storage capacity?

Spain has launched an ambitious €700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes pumped hydro, thermal energy storage, and battery systems.

How has Spain strengthened its energy infrastructure?

Spain has taken a decisive step in strengthening its energy infrastructure with the launch of a €700 million support scheme aimed at expanding large-scale energy storage across the country.

What is Casablanca solar power plant – thermal energy storage system?

The Casablanca Solar Power Plant – Thermal Energy Storage System is a 50,000kW molten salt thermal storage energy storage project located in Talarrubias, Badajoz, Spain. The thermal energy storage battery storage project uses molten salt thermal storage storage technology.
