Spanish mobile power storage vehicle customization

Overview

Why is Spain a good place to buy electric cars?

Spain's notable positioning in this market is undoubtedly due to the winks received from the administration. The Government hopes that it will become a benchmark country both in the production of batteries for electric vehicles and in new forms of green and sustainable mobility.

How much money will Spain invest in a Gigafactory & assembly plant?

With an investment of more than 7,000 million euros, the national territory will host important projects, among which the gigafactories and assembly plants of PowerCo Spain, Envision, Basquevolt, Stellantis, InoBat, FORD Almussafes and Phi4tech stand out.

How will Spain rank among the top 6 battery producers?

Here are the key elements of Spain's strategy to rank among the top six producers. It is estimated that by 2030, Spain's battery production capacity will range between 42 and 72 gigawatt-hours (GWh), which would place it as the sixth nation with the highest battery production capacity in the European Union (EU).

Is Valencia becoming a hub of innovation in mobility?

According to Jackie Sánchez-Molero, manager of the Automotive and Mobility Cluster of the Valencian Community (AVIA), to Mobility Portal España, Valencia is becoming a hub of innovation in mobility.
