# St George RV Outdoor Power

The image is a composite of three parts. At the top is a photograph of a modern, dark-colored, two-story house with large windows and a garage. In the foreground, on the left, is a large, white, rectangular solar inverter unit with a small black display screen at the top. To the right of the inverter is a white box with text and images. The text on the box reads: "Support photovoltaic input and AC mains input" and "Suitable for home energy storage and emergency backup power supply". Below the text is a photograph of various electrical equipment: a white range hood, a white oven, a black refrigerator with a digital display, a silver laptop, and a silver water dispenser. The background of the entire image is a landscape with mountains and solar panels.

**Support photovoltaic input and AC mains input**  
**Suitable for home energy storage and emergency backup power supply**

## Overview
