Tender for energy storage batteries for Middle East solar container communication stations

Overview

What is Saudi Arabia's battery storage program?

The projects mark the first phase of Saudi Arabia's battery storage program, designed to support its goal of 50% renewable energy by 2030. Each 500 MW facility will operate for four hours, providing 2,000 MWh of total power capacity, said the Saudi Power Procurement Company (SPPC).

Will Saudi Arabia be able to deploy battery energy storage systems by 2030?

According to Saudi Energy Minister Prince Abdulaziz bin Salman, the nation has set a goal of deploying 48GWh of battery energy storage systems by 2030. This ambitious target not only supports Saudi Arabia's energy transition but also injects fresh momentum into the global renewable energy and energy storage markets.

Will Saudi Arabia host a gigawatt-hour battery storage facility?

In addition to public-private partnerships such as through SPPC, Saudi Arabia will host gigawatt-hour scale battery storage facilities to integrate renewable energy at major infrastructure projects such as the Red Sea Project coastal tourist destination. Image: Red Sea Global.

Who are the bidders for a 2 gw/8 GWh battery energy storage system?

From ESS News The Saudi Power Procurement Company (SPPC) has released a list of 33 prequalified bidders for its 2 GW/8 GWh battery energy storage system (BESS) tender. The tender, structured as a build-own-operate model, attracted major international players including Masdar, ACWA Power, EDF, TotalEnergies, Jinko Power and more.
