The solar energy storage cabinet is frozen outside the wall

Overview

Can the nv14 energy storage system be installed on a south-facing wall?

The NV14 Energy Storage System must not be installed on a south-facing wall if routinely over 120° F to prevent possible overheating and a shortened battery life. If installed outside on south facing wall and ambient temperatures are routinely over 120° F, then shade the NV14 Energy Storage System.

Can the nv14 energy storage system be installed outside?

It is the responsibility of the authorized installer to determine the specific devices and interface requirements at each location. The NV14 Energy Storage System can be installed indoors, such as a garage, or outdoors mounted using a concrete or pre-formed pad. The cabinet is a NEMA 3R rated cabinet suitable for outdoor use.

Is the nv14 energy storage cabinet a 3R rated cabinet?

The cabinet is a NEMA 3R rated cabinet suitable for outdoor use. The NV14 Energy Storage System requires clearance for cooling and service access. The cabinet must be installed with 2" clearance on right side, 6" on SW1 switch side and 36" clearance to the front.

Should I shade the nv14 energy storage system?

If installed outside on south facing wall and ambient temperatures are routinely over 120° F, then shade the NV14 Energy Storage System. The NV14 Energy Storage System must be installed on a rigid, flat level surface capable of supporting the full weight of the cabinet. A concrete surface or pre-cast concrete pad is highly recommended.
