# Tiled solar panels and prices

Voltage range: 691.2-947.2V

>6000 cycles (100%DOD)

Rated battery capacity:  
216KWH (customizable)

EMS communication:  
4G/CAN/RS485

## Overview

---

In this guide, we'll cover everything you need to know about solar roof tiles — including their efficiency compared to regular panels, how much they cost, where to buy them in the UK, and the top brands to consider. What are solar roof tiles?

Just like solar panels, solar roof tiles convert sunlight into electricity, but they're made to look just like traditional roof tiles. Some models are actual roof tiles with integrated solar cells.

How much does a solar roof tile system cost?

To give you an idea, the average 3.5 kW solar roof tile system will cost around £13,000, compared to approximately £7,000 for a regular PV system. However, remember that you are also getting a new roof with your solar tiles, so a direct price comparison is slightly misleading. Information last updated in April 2025.

Are solar panels better than roof tiles?

Solar panels, that is solar panels on slate roofs, are still the better investment overall compared to solar roof tiles. Roof tiles are expensive because you are ultimately installing a new roof, and while they look great, they can be less efficient than solar panels.

Are Tesla Solar Roof tiles available in the UK?

Tesla solar roof tiles aren't currently available in the UK, and it's unclear when, if at all, they will be. If Tesla solar roof tiles become available, the company said they will cost \$21.85 (£17.23) per square foot. That's equivalent to \$235.12 (£185.37) per square metre.
