Tokyo Solar Power Inverter

Overview

Why do Japan import solar inverters?

Solar inverters, essential for converting DC electricity (produced by solar panels) into usable AC electricity, are imported into Japan at a 0% duty rate. This lower tariff helps keep the cost of adopting solar energy systems affordable for businesses and consumers in Japan.

Where can solar systems be installed in Japan?

Solar systems are currently being installed on factories and logistics facilities under power purchase agreements (PPAs) for commercial customers and public institutions. The Japanese solar market is seeing an increase in C&I parks. Sungrow offers SG49.5CX-JP and SG100CX-JP string inverters, as well as ST159KWH-50HV energy storage systems.

Who makes IQ8 microinverters in Japan?

Enphase Energy announced production shipments of IQ8™ Microinverters in Japan through a distribution agreement with ITOCHU Corporation (ITOCHU), one of the largest trading companies in the country. Starting April, Tokyo became the first Japanese city to mandate rooftop solar on all new homes built by large-scale homebuilders.

Who makes Hitachi solar inverters?

Established in 1910 and headquartered in Tokyo, Japan, Hitachi is renowned for integrating advanced technologies into renewable energy systems, making it a trusted name in solar power solutions worldwide. Key Products and Services: Hitachi offers a wide range of solar inverters, including grid-tied models with high efficiency.
