Total installed capacity of global power storage

Overview

Which country has the most energy storage capacity in 2024?

The global energy storage market had installed 175.4 GWh of capacity by 2024, with Tesla leading shipments. Europe accounted for 19.1 GWh of installed capacity last year, with Italy leading, ahead of the United Kingdom and Germany.

Is energy storage a global consensus?

The consultancy noted “the development of energy storage has become a global consensus,” and pointed to the prediction, made at the COP29 climate change summit held in Azerbaijan in late 2024, that global energy storage project capacity will increase to 1.5 TW by 2030.

How many GWh of energy storage are there in 2024?

The Americas added 41.3 GWh of energy storage in 2024, up 53% year on year, with the United States and Chile leading the way. Some 90% of systems in the United States were for short-term energy storage, with an average storage duration of 3.1 hours nationwide, rising to four hours in California.

Which country has the most energy storage capacity in Europe?

Europe added 19.1 GWh of energy storage capacity last year, up 12.4% from 2023. Italy has become Europe’s largest energy storage market thanks to utility-side, front-of-the-meter (FTM) systems, and leads Germany and the United Kingdom.

Total installed capacity of global power storage

Visualized: Countries by Grid Storage Battery Capacity in 2023

The International Energy Agency estimates that 1,300 GW of battery storage will be needed by 2030 to support the renewable energy capacity required to meet the 1.5°C ...

InfoLink: 222 GWh more energy storage worldwide in 2025

The global energy storage market had installed 175.4 GWh of capacity by 2024, with Tesla leading shipments. Europe accounted for 19.1 GWh of installed capacity last year, ...

Global energy storage market: review and outlook

The global energy storage market added 175.4 GWh of installed capacity in 2024, with the three major regional markets--China, the Americas, and Europe--continuing to ...

New global battery energy storage systems capacity doubles ...

Battery deployment to increase rapidly
The IEA forecasts a rapid increase in the global deployment of battery storage, supported by falling costs and increasing government ...

Global energy storage installed capacity in 2030

Total installed battery storage capacity in the Net Zero Scenario, 2015-2030 - Chart and data by the International Energy Agency. Global Energy Crisis; Critical Minerals; All topics.

Global energy storage

Global energy storage capacity outlook 2024, by country or state Leading countries or states ranked by energy storage capacity target worldwide in 2024 (in gigawatts)

CNESA Global Energy Storage Market Tracking

✓ LIQUID/AIR COOLING

✓ PROTECTION IP54/IP55

✓ PCS EMS

✓ BATTERY /6000 CYCLES

The share of pumped hydro storage in the total installed capacity fell below 50% for the first time. Among these, the cumulative installed capacity of non-hydro energy storage ...

World's energy storage capacity forecast to exceed a

...

In BloombergNEF's 2H 2023 Energy Storage Market Outlook report, the firm forecasts that global cumulative capacity will reach 1,877GWh capacity to 650GW output by ...

Global Energy Storage to Hit 94 GW in 2025, Says BNEF

The global energy storage sector is on track for another record year in 2025 as utility-scale projects expand into new regions. BloombergNEF (BNEF) forecasts that ...
