Does Tuvalu have solar power?

All the islands of Tuvalu are on 24/7 power supply and the access rate is 100%. The outer islands are powered by hybrid solar PV system with diesel generator on standby. For the main island of Funafuti there are some solar PV systems tied to the grid with diesel base load generators.

What challenges does Tuvalu face?

Tuvalu's geographic and economic context presents unique challenges for energy provision. The nation's dispersed islands, with Funafuti as the capital and most populated atoll, complicate energy distribution and infrastructure development.

Why does Tuvalu need a diesel generator?

Historically, Tuvalu has relied heavily on diesel generators for electricity, a system that is both costly and environmentally unsustainable. The high cost of imported fuel places a significant burden on the national budget, diverting resources from other critical areas such as healthcare and education.

How does Irena support Tuvalu?

Organizations like the International Renewable Energy Agency (IRENA) and the International Solar Alliance (ISA) further support Tuvalu by offering policy guidance, capacity-building programs, and access to a global network of renewable energy experts (IRENA, 2025; Testbook, 2024).
