# **UPS battery cabinet shutdown steps**

## Overview

---

How do I shut down an uninterruptible power supply (UPS)?

Shutting down an Uninterruptible Power Supply (UPS) without impacting the IT load is crucial to avoid data loss or hardware damage. Here are the steps you should follow to safely shut down a UPS: Notify Personnel: Communicate with the IT team and any other relevant personnel about the planned UPS shutdown.

How do I Turn Off the Battery breaker on my ups?

Close maintenance bypass switch IA1 on all cabinets (position ON). 3. Press simultaneously the two ON/OFF buttons on the UPS-control panel (PMD) and turn OFF the relative IA2 output breaker on each module in the system. 4. Open battery fuses/breakers on the internal (if any) and the external battery cabinets or racks.

How do I prepare for a ups shutdown?

Notify Personnel: Communicate with the IT team and any other relevant personnel about the planned UPS shutdown. This ensures that everyone is aware of the process and can prepare accordingly. Check Battery Status: Ensure that the UPS battery has sufficient charge to support the IT load during the shutdown process.

How do you power down a ups?

Power Down Equipment: Once all IT equipment is safely shut down, you can power down the UPS itself: Disable Bypass Mode: If your UPS has a bypass mode, disable it to ensure that power flows through the UPS during the shutdown process. Turn Off Output Power: Depending on the UPS model, there might be a switch or button to turn off the output power.
