# **Ubs uninterruptible power supply battery cabinet assembly**

## Overview

---

What does a battery cabinet power?

Battery cabinets are designed to hold batteries used to power an uninterruptible power supply (UPS) system. In the event of a power disruption or outage, the UPS system ensures that your devices continue to operate from the energy stored in the batteries in the battery cabinet.

What is the battery capacity of the UPS system?

The UPS system uses batteries in the battery cabinet to provide power during disruptions. The battery capacity is 34.6 kWh. The system is lithium-ion based and can support up to 5 MW in parallel.

Why do we need a backup battery cabinet?

Through cutting-edge research and innovation, advanced engineered power products for backup battery cabinets have become essential to our energy future. When the power goes out, battery backups ensure that the Internet, cloud-based data, financial and health records stay accessible.

Does ABB offer a standalone or modular UPS?

For every application and every context, ABB has a standalone or modular UPS. From the world's largest data centers to office server rooms, ABB solutions lead the field in UPS innovation. Speak to our experts for customer-focused critical power solutions that deliver more – space, savings and scalability.
