Uninterruptible Power Supply for Zambia Manufacturing Industry

Overview

What is a Mitsubishi Electric uninterruptible power supply (UPS) system?

Mitsubishi Electric uninterruptible power supply (UPS) systems provide daily power conditioning as well as backup power in the event of an outage to reduce damage to manufacturing equipment and maintain uptime for your production line.

Is Zambia's Electricity consumption outstripping its installed supply?

According to the Zambia Development Agency, in the last three years electricity consumption in Zambia has exceeded its installed supply. In response to a power capacity deficit, Zambia has increased its electricity exports to neighboring countries, leading to rolling blackouts across the country.

Why do you need an uninterruptible power supply system?

Uninterruptible power supply systems can reduce downtime (and its cost) in manufacturing by providing reliable backup power in an emergency. A UPS allows your systems to shut down slowly, in alignment with standard procedures, as opposed to the rapid shutoff of an outage, which could damage the equipment.

What is MTU uninterruptable power supply?

Whether for food processing, chemical, textile or other critical manufacturing processes, mtu distributed energy solutions including uninterruptable power supply are aimed at maximizing uptime.
