Uninterruptible power supply wholesale for transportation

Overview

What is UPS (uninterruptible power system)?

UPS (Uninterruptible Power System), that is, uninterruptible power supply, is a constant voltage and constant frequency uninterruptible power supply with energy storage devices and inverters as the main component.

What is an industrial uninterruptible power supply system?

Industrial uninterruptible power supply systems (UPS Systems) include core technologies to cover industrial equipment. Our systems offer applications ranging from a few hundred watts to massive Multi-Mega Watt Parallel UPS installs inclusive of voltage regulations, voltage correction, sag correction, surge suppression and harmonic mitigation.

Why is an uninterruptible power supply necessary?

An uninterruptible power supply (Uninterruptible Power Supply or UPS) has become a necessity rather than a choice in various sectors of life, including industrial facilities, hospitals, homes, and offices. The electrical network may experience situations such as high or low voltage, sudden voltage jumps, or frequency changes.
