Uruguayan outdoor communication battery cabinet export by sea

Overview

How to export lithium batteries by sea?

For the export of lithium batteries by sea, a dangerous goods packing certificate is required, that is, a dangerous goods packing certificate. The packaging manufacturer needs to go to the inspection and Quarantine Department of the local customs to issue a certificate, and the packaging should meet the packaging requirements of lithium batteries.

Are lithium batteries subject to Chinese customs supervision conditions?

Even though lithium batteries are not subject to Chinese customs supervision conditions, the following documents are essential for smooth booking and clearance: Note: Some destinations (such as the US, EU, or Australia) may also require UN38.3 test reports, IEC certificates, or technical battery specs. Always check destination-specific regulations.

Can a lithium battery be exported as non-DG?

Not all lithium battery products require full DG procedures. Some can be certified as general cargo after inspection by an authorized lab. If the product is certified as general cargo (e.g., low power, installed in device, compliant packaging), it can be exported as non-DG.

What are un3480 & un3171 batteries?

UN3480: Lithium-ion batteries shipped without any equipment. These must strictly follow DG procedures. UN3481: Lithium-ion batteries contained in or packed with equipment such as tablets or drones. UN3171: Battery-powered equipment or vehicles, such as electric forklifts, where the battery is an integral part of the whole unit.
